SUSTAINABILITY

NATIVE MARINE MAGNESIUM
MAGNESIUM GREENFLASH

> From the water of the Irish Sea, part of the Atlantic Ocean that lies between the shores of Great Britain and Ireland.

YOU NEED MAGNESIUM IF:

- you have increased anxiety, sleep disturbance;
- you get very tired, experience emotional instability;
- you live an active lifestyle, do sports;
- you have a disrupted work/rest schedule, an irregular schedule;
- you have an event ahead that requires increased concentration of attention;
- you want to adapt more easily after flights or change of time zones;
- you have a magnesium deficiency or you follow a strict diet;
- you want to support the health of the cardiovascular system.

NATIVE MARINE MAGNESIUM

MAGNESIUM GREENFLASH

NATURAL SOURCE OF MAGNESIUM

The waters of the Atlantic Ocean between the islands of Great Britain and Ireland that wash the picturesque shores of these countries are the source of a unique ecosystem. Since the early 90s of the XX century, the Marigot company (Ireland) has been developing and studying sea minerals collected in these places, and producing Aquamin from them, the raw material that we have taken as the basis of our dietary supplements in organic form.

FORM OF THE MINERAL

Marine magnesium is created naturally when calcium oxide reacts with magnesium in seawater to become **magnesium hydroxide**. This form of magnesium additionally comprises more than 70 marine minerals that work as activators of magnesium bioactivity: selenium, boron, cerium, carbon, titanium, thorium, aluminum, sodium, chlorine, silicon, cobalt, etc.

THE EFFECTIVENESS HAS BEEN SCIENTIFICALLY PROVEN

Marigot company (Ireland), which develops marine minerals and is a manufacturer of raw materials for dietary supplements Magnesium Greenflash, has prepared more than 30 scientific papers confirming the effectiveness of Aquamin raw materials.

HAS HIGH BIOAVAILABILITY

Scientific studies conducted at the University of Cork (Ireland) confirmed the unique bioavailability of Aquamin Ag, a source of magnesium hydroxide. This form of magnesium is best absorbed in the gastrointestinal tract compared to traditional ones. The properties of magnesium are enhanced when combined with vitamin B6, and the vitamin itself contributes to the delivery of magnesium at the cellular level.

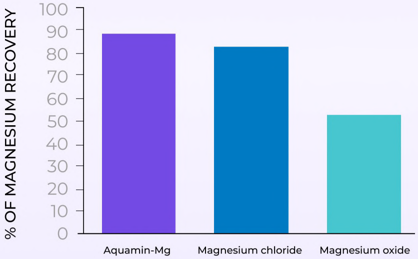
IT IS REPLENISHED IN NATURE NATURALLY

In the process of collecting and processing sea water, great attention is paid to respect for the environment, protection of the unique vegetation ecosystem and the replenishment of the resource from which the mineral is formed. The result is a natural, safe product of natural origin, replenishable in nature.

«HALAL» CERTIFIED

THE BIOAVAILABILITY OF MAGNESIUM FROM AQUAMIN-MG RAW MATERIALS IS SCIENTIFICALLY PROVEN

Aquamin-Mg, a source of magnesium, has shown high in vitro bioavailability compared to magnesium analogues such as MgCl and MgO.



Percentage of magnesium recovery from Aquamin-Mg, magnesium oxide and magnesium chloride after the in-vitro breakdown.*

* According to **Bioaccessibility and Bioavailability of a Marine-Derived Multimineral, Aquamin-Magnesium**, Valeria D. Felice, Denise M. O'Gorman, Nora M. O'Brien and Niall P. Hyland

730 LITERS

OF GREENFLASH MAGNESIUM

DID YOU KNOW?

ⓘ

According to various estimates, up to **80% of people don't get enough magnesium** from their diet, almost **45% are magnesium** deficient. Magnesium is known to help in the creation of the hormone **serotonin**, which improves mood.

MAINTAINING AN OPTIMAL LEVEL

OF MAGNESIUM IN THE BODY HELPS:

- REDUCE TIREDNESS AND FATIGUE,
- IMPROVE LEARNING ABILITY AND MEMORY,
- RESIST STRESS, ANXIETY AND DEPRESSION,
- INCREASE MUSCLE STRENGTH AND ENDURANCE,
- STRENGTHEN BONES,
- SUPPORT CARDIOVASCULAR HEALTH.

MARINE MAGNESIUM — APPLICATION SCHEME

MARINE MAGNESIUM

1-2 capsules of Marine Magnesium per day =

160-320 mg of magnesium (40-80% RDI)
1–2 mg of vitamin B6 (50–100% RDI)
during or after a meal

Duration — 30 days

* % RDI (% of the recommended daily intake) according to the TR CU 022/2011 "Food products in terms of its labeling," Annex 2
