Iron (Fe)

KEY MINERAL FOR
THE HEMATOPOIETIC
SYSTEM

Zinc (Zn)

KEY MINERAL FOR IMMUNITY,
REPRODUCTIVE SYSTEM AND
CARBOHYDRATE METABOLISM

ADVANTAGES OF THE CHELATED FORM OF MINERALS:

Easily
absorbed
by the body

- it is a compound of a mineral and an amino acid
- it structurally resembles a crab claw, that's why it is called "chelate" from lat. "chele" - claw

Has high
bioavailability

- it is closest to our body, quickly penetrates into cells
- it is ready for assimilation as it is — no additional biochemical reactions are required

Zinc (Zn)

KEY MINERAL FOR IMMUNITY,
REPRODUCTIVE SYSTEM AND
CARBOHYDRATE METABOLISM

YOU NEED ZINC (Zn) if:

- you want to strengthen your immune system, often get sick or have suffered a disease;
- you want to support your reproductive system;
- you have problems with carbohydrate metabolism;
- you have skin problems (redness, inflammation, acne);
- you want to balance the work of the sebaceous glands of the head skin / you want to correct the increased oiliness of the hair;
- it is important for you to have strong and smooth nails, strong and shiny hair.

Chelated bioavailable form of Zinc:

- helps maintain the immune barrier
- contributes to the balance of the reproductive system of men and women
- contributes to the correction of carbohydrate metabolism
- is involved in appetite regulation
- is an important element for the beauty of skin and hair

DID YOU KNOW?

The trace element zinc belongs to the class of vital substances. An adult human body contains about 2 g of zinc. But despite the fact that its daily requirement does not exceed 15 mg, it is difficult to "get" it from food. According to WHO estimates, more than 20% of the world's population have a zinc deficiency.

= **15 mg Zn**
100 % RDI*

* % RDI (% of Reference
Daily Intake)

Greenflash Zn contains
natural vitamin C from
acerola fruit extract to
enhance zinc absorption

Iron (Fe)

KEY MINERAL FOR
THE HEMATOPOIETIC
SYSTEM

YOU NEED IRON (Fe) if:

- you have signs of anemia (weakness, dizziness, etc.);
- you experience increased irritability and rapid fatigue;
- paleness and dryness of the skin bother you;
- you want to improve performance;
- you need to strengthen the immune system;
- you want to support the functioning of the circulatory system;
- you follow a strict diet, follow a vegetarian or vegan diet.

Chelated bioavailable form of Iron:

- is an important element in preventing anemia
- helps prevent iron deficiency
- is involved in the regulation of hemoglobin levels
- protects against oxygen starvation
- helps maintain good health and high performance
- helps reduce the duration of post-covid syndrome

DID YOU KNOW?

According to WHO, approximately 15% of the population in Russia suffer from anemia. Most often, girls and women under 45 are at risk.

= **12,6 mg Fe**
90 % RDI*

* % RDI (% of Reference
Daily Intake)

Greenflash Fe contains
natural vitamin C from
acerola fruit extract to
enhance iron absorption.

RECOMMENDATIONS FOR USE:

adults **1 capsule** per day with meals.
Duration — 30 days. The course can
be repeated if necessary.

CONTRAINDICATIONS:

individual intolerance to the components of
dietary supplements, pregnancy,
breast-feeding.

Please, consult with
your physician
before use

1 CAPSULE per day
provides the
recommended daily
intake of minerals

MAXIMUM RESULT WITH DIETARY SUPPLEMENT PROGRAMS

Combine zinc and iron with other dietary
supplements in Key to Health programs:

Greenflash®
Zinc (Zn)

You feel the first signs of ARVI
(runny nose, weakness,
headache)

Antivirus Set

You want to strengthen your
immune system during the
cold season

Immuno Set

Your eyes get tired quickly.
You spend a lot of time driving.
You want to maintain the vision

Vision Set

Greenflash® Zinc (Zn) + Greenflash® Iron (Fe)

You have suffered COVID,
you want to prevent
exacerbation of chronic
diseases after a viral infection

Post-Covid Set

DIETARY SUPPLEMENT. IT IS NOT A MEDICINAL PRODUCT.
