

Lactoferra

Natural immunity boost

- + Do you get sick often and want to boost your immune system?
- + Do you want to recover faster from illnesses and injuries?
- + Are you concerned about protecting your body during viruses and seasonal colds?
- + Feeling low on energy and want to improve your overall body condition?
- + Are you iron deficient and need to increase iron absorption?

keytohealth

Lactoferra is a modern solution for strong immunity and natural body defenses

Active substances, their properties and action

IMMUNOGLOBULINS

Are protective proteins (antibodies). Are a major component of colostrum.

These are ready-made immune system cells that are involved in the immune response.

They bind to bacteria, viruses, fungi, toxins and help neutralize them.

Regulate the immune response, controlling the duration and strength of the immune response.

LACTOFERRIN

Is a multifunctional protein, a versatile protective component.

It has antiviral and antibacterial activity.

It has an anti-inflammatory effect.

Regulates the work of general and local immunity.

Stimulates tissue regeneration processes.

Participates in the regulation of iron metabolism, enhances the synthesis of proteins responsible for the formation of hemoglobin.

A single capsule contains:

* An adequate level of consumption has not been established.

Greenflash

The active ingredients in Lactoferra are IN NATIVE FORM

due to the valuable components of the formulation:

COLOSTRUM

Is the primary milk of mammals, containing numerous substances that form immunity, primarily immunoglobulins, lactoferrin and lysozyme.

WHEY

Is the most valuable part of milk. It is a source of amino acids, antibacterial substances, vitamins and minerals in natural form.

Useful properties of other colostrum and whey active materials

LYSOZYME

Is an enzyme of protein nature and is capable of breaking down the shell of bacteria.

AMINO ACIDS

(including the essential ones: leucine, lysine, valine, arginine, threonine, isoleucine, phenylalanine, etc.)

Are the building material for cells. They affect the state of the immune system, nervous system, promote tissue regeneration, improve mental performance.

Easily digestible VITAMINS AND MINERALS

Are important substances for the body that perform many roles: strengthening the immune system, turning food into energy, helping to repair cellular damage, etc.

Why Lactoferra?

✓ A natural source of immune components

✓ All-natural contents

✓ Contains no synthesized components

✓ Comprises colostrum and freeze-dried whey
Lyophilic drying is slower, more technologically advanced and thus more expensive than conventional traditional drying. Allows for the most gentle removal of water, maximizing the preservation of all natural elements and native properties of the product

✓ Gluten-free, GMO-free

Lactoferra — application

2–3 capsules per day

Duration of admission — 1 month

The course can be repeated if necessary

Use it together

To boost immune defenses

Lactoferra

Vitamin C liposomal

Zinc (Zn)

Metabiotic

Vitamin C liposomal

Vitamin B9+B12

Iron (Fe)

For the blood improvement

Lactoferra

Vitamin C liposomal

Vitamin B9+B12

Iron (Fe)

Greenflash® 90 capsules 628 mg
