

BIODRONE®

A humic substances-based immunoactivator

THE BENEFITS OF THE NATURE

HIGH PURIFICATION RATE

28 MONODOSE OF 2 ML → BIODRONE

What is an adaptogen?

Adaptogens are drugs that enhance the body protective properties and improve resistance to harmful factors.

biological
(viruses, bacteria)

physical
(temperature changes, physical overload)

chemical
(toxins, heavy metals)

emotional
(stress, worries, anxiety)

BIODRONE®

Biodrone — is an active humic complex

Humic and fulvic acids have been used in traditional medicine for over 3,000 years as classic biogenic stimulants, having a positive effect on all the human body systems.

We took the best from the nature

Humic and fulvic acids have a powerful effect on any living organism due to the unique natural composition on which all living things are built. They are sources of vitamins, micro- and macronutrients, and amino acids. High bioavailability allows the maximum absorption of the necessary for the body substances.

The peculiarity of the humic acid complex is its unique selectivity

- ◆ Bind harmful objects (viruses) and compounds (toxins, harmful and heavy metals), but leave potassium, magnesium, calcium, etc.
- * Promote the transport of potassium, magnesium, calcium, selenium and other elements into human and animal tissue cells

With Biodrone you can:

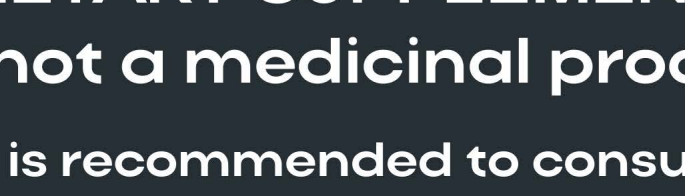

- Support and strengthen the immune system at the cellular level
- Restore the body's natural defenses
- Reduce the environmental impact on the body
- Prepare the body for seasonal allergic manifestations
- Prevent oxidative stress
- Improve the tone and endurance of the body
- Restore detoxification activity of organs
- Improve the absorption of nutrients and vitamins

A unique natural product to increase the duration and quality of life

How to use:

- For adults, dilute 1 ampoule of monodose (2 ml) in a glass of drinking water
- 1 time a day with meals
- The duration of admission is 28 days
- The course can be repeated if necessary

DIETARY SUPPLEMENT.
It is not a medicinal product.

It is recommended to consult a specialist before use.
