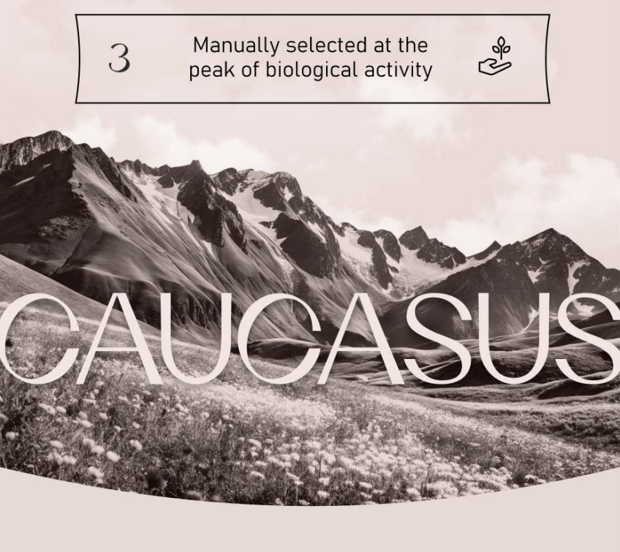
WHAT IS NL Herbal Tea?

ONLY SELECTED, PURE AND HIGH QUALITY RAW MATERIALS

1 Only the best ingredients

2 Grown in ecologically clean North Caucasus foothills

3 Manually selected at the peak of biological activity



THE NORTH CAUCASUS

Famed for its pure nature reserves and unique endemic herbs

This special natural environment conceals the secret of the legendary Caucasian longevity

Fito Science

A SCIENTIFIC APPROACH TO HERBAL MEDICINE

Phytotherapists and nutritionists have developed effective natural compounds of herbal teas

Combined contemporary scientific research and the herbal medicine ancient traditions

IT IS INTERESTING

- Pharmacognosy is the science of medicinal herbs
- It dates back to 1811, and until now a large number of scientists are still researching and discovering new beneficial substances in medicinal herbs

5 000 the scientific papers published over the past couple of years are devoted to:

- revealing new active compounds in herbs
- investigation of their impact on the body

100% natural

NO ADDED FLAVORINGS OR FRAGRANCES

Thoughtfully selected herbs and balanced blends give the drink a pleasantly rich flavor

WHAT COULD BE EASIER?
Enjoy a delicious drink and get the most out of it

HIGH QUALITY STANDARDS

Each batch is manufactured in accordance with international standards and is subjected to a multi-stage quality control process, starting with the selection of botanical ingredients and resulting with the finished product packaging.

Step 1

Collection and harvesting of raw materials

An individual way considering the peculiarities of herbs and active substances

MANUAL COLLECTION

Plants are hidden in hard-to-reach places where only expert hand pickers can harvest them by hand

RULE 1/3

During harvesting, part of the plants are left intact to preserve the natural plantations

BIOACTIVITY PEAK

The herbs are picked at the period of the maximum concentration of active substances

Step 2

Incoming Inspection

All raw materials are fully analyzed for all quality parameters

ACTIVE COMPOSITION ANALYSIS

Each herb batch is laboratory tested for its active ingredient content

RAW MATERIALS SORTING

By categorizing herbs according to a defined range of assets, it is possible to precisely reproduce a herbal tea with a stable composition and adjusted amount of active ingredients. This means that every cup of tea will be equally effective.

Step 3

Production control

THE RULE OF COMPATIBILITY

The blends are selected to maximize synergy

GRINDING BEFORE BLENDING

Gentle plant grinding preserves their natural benefits and increases the liquid contact area for herbal tea efficacy

DISTRIBUTION PACKAGING

The ready blend is packed into filter bags on special multi-roll equipment preserving the stable fraction, weight and organoleptic parameters of the tea drink

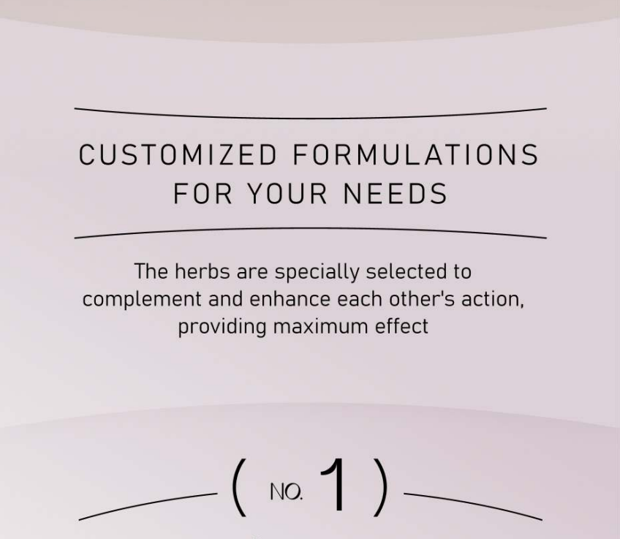
Step 4

Output control

A complete analysis of the finished product: chemical and microbiological

INDIVIDUAL PACKAGING

In order to preserve the healing properties and flavor of the herbs of the North Caucasus to the best possible extent, each filter bag is carefully packed in a multi-layer protective envelope



Our blends have preventive qualities and are suitable for daily use. We don't heal people, we help them to stay healthy.

CUSTOMIZED FORMULATIONS FOR YOUR NEEDS

The herbs are specially selected to complement and enhance each other's action, providing maximum effect
